

An Inexpensive Way to Improve Shot Quality

- Ensures Positive Shot Control
- Prevents Blow-back
- Extends Quality of Production Runs

If your barrel is a little worn and you need a temporary remedy to improve shot performance, then a compression collar offers a quick and easy solution. Each Compression Collar includes an Expandable Compression Seal and a Check Ring. Together they work to improve shot performance and increase cushion stability.

Services For Plastics, Inc. will install a Compression Collar on your existing screw tip or you can easily install one yourself.
