

Oil Only Pads

ENV™ Pads

ENV™ Pads are oil only contract grade sorbents that now include **MAXX™** technology to make them more absorbent than ever before without added weight or added cost! These pads repel water and float even when they're saturated with oil. **ENV™ Pads** work well for marine and industrial applications.

PART NO.	DESCRIPTION	PADS/CASE	PRICE/CASE

SPC107700	ENV, 15" x 19", Light Weight Economy, Double Coverage	200	

SPC™ Pads

SPC™ Pads are the original, and still the favorite, of many professionals for containing oil spills. Made with **MAXX™** technology they are more absorbent than ever before yet still lightweight. Each pad is bonded for strength, dimpled and perfed so you can use one or more sheets at a time. Since they repel water, they're often recommended for outdoor use. Applications include: spill clean-ups, offshore spills and outdoor industrial applications where lint is not a concern.

SPC107821	SPC, 15" x 19", Heavy Weight, Dimpled and Perfed	100	Call for Pricing
SPC107825	SPC, 15" x 19", Light Weight, Dimpled and Perfed, Double Coverage	200	

Oil Only Pads

Oil Plus™ Pads

Made to absorb non-water soluble liquids, **Oil Plus™ Pads** are perfed so you can easily pull off the amount of sheets you need for the job. Multi-ply and heavyweight, they work well for indoor and outdoor petroleum clean up in industrial and environmental applications.

SPC107749	OIL PLUS, 15" x 19", Heavy Weight, Full Size Perfed Pad	100	Call for Pricing

Oil Only Pads

SXT™ Pads

Specifically for low-lint, oil only applications like food processing, high-tech industry, pharmaceutical and more, these **SXT™ Pads** are heavyweight and won't fall apart once saturated. The spun bond cover stock on both sides keeps lint to a minimum and makes pads strong enough to wring out and re-use. Perfed to cut down on excessive use.

SPC107837	SXT, 15" x 19", Heavy Weight, Full Size Perfed Pad	200	Call for Pricing

Universal Pads and Rolls

GP™

GP™ is an all-around great sorbent that can be used on basically all fluids. It's a premium product with an economical price. And now it's even better with advanced **MAXX™** technology that adds greater absorption qualities without adding weight. Anywhere there's a leak or a spill - you will find these pads indispensable.

SPC107707	GP, 15" x 19", Economy Weight, Double Coverage	200	

Universal Pads and Rolls

MRO Plus

MRO Plus is our number one universal sorbent and comes in several weights and sizes to provide you with the exact sorbent you need for the job. Its 3-ply construction absorbs all industrial liquids, is more durable and reduces lint. Can be used basically anywhere there's a drip, leak or spill including machine, maintenance and liquid storage areas.

SPC107718	HT Series, 30" x 300' Medium Weight, Double Perfed Roll	Call for Pricing

UXT™ Xtra Tough Sorbents

Made "**Xtra Tough**" for the toughest jobs around. **UXT™ Sorbents** can handle any liquid be it water, petroleum or chemical based. Since it uses spun bond cover stock on both sides of the pad, it's durable and low lint - even non-abrasive so pads can be used for wipe down applications. These pads are so tough you can wring them out and re-use.

Universal Plus/MaxxChemical

Because green is the universal symbol for safety, **Universal Plus** pads and rolls are created with a green tint to signify that these pads will soak up any liquid including hazardous chemicals and acids. Their 3-ply construction makes them stronger and reduces lint. Perforated so you don't create waste by pulling off more than is needed.

The only difference between the **Universal Plus** and **MaxxChemical** is their appearance. **MaxxChemical** is color-coded yellow for safety and easy separation. Uses include labs, hospitals and any other industry that uses hazardous fluids.

PART NO.	DESCRIPTION	PAD/CASE	PRICE/CASE

SPC 107845	Universal Plus, 15" x 150", Two-Pack, Perfed Every 9" and up Center, Green	2 rolls	

Sorbent SOCS

Routinely used for all kinds of spill containment because they're flexible and dependable. **Sorbent SOCs** come in several different types for different jobs and a variety of liquids. The **Slikwik® SOC** is filled with all-natural corncob and can soak up all liquids except aggressive fluids. **Multiwik™** is a universal economy **SOC** that can be wrung out as well as incinerated. Not to be used on aggressive fluids. **Allwik® SOCs** are made from polypropylene and are suitable for use in most industries, and just like the **Multiwik™**, can be wrung out and incinerated. The **Oil Only SOC** is made from a special oil-only polypropylene that will not absorb water - just oil as the name implies.

PART NO.	DESCRIPTION	SOCS/CASE	PRICE/CASE
SPC107836	Slikwik SOC, 3" x 42", Corncob Filled	40	Call for Pricing 800-627-1033
SPC107737	Multiwik SOC, 3" x 4', Universal Economy	40	
SPC107674	Allwik SOC, 3" x 4', All-Purpose Polypropylene	12	
SPC107744	Oil Only SOC, 3" x 4', Polypropylene	12	

Industrial Mats

Make work a safer place with **Industrial Matting**. IT can be used in high-traffic areas as well as at workstations to absorb water, oil and even aggressive fluids. Matting is made from needle-punched polypropylene and stick to floors to keep workers from slipping. The dark color masks any drips or spills.

SPC 107682	Barrier Spill Matting, 36" x 100' roll	Call for Pricing

Portable Spill Kits

Allwik

Universal **Allwik Portable Spill Kits** are there for you in an emergency. The **Economy Spill Kit™** is stored in a bright-yellow bag so it's highly visible at all times and can absorb five gallons of liquid per kit. The **Attack Pac™** is a single-use kit packed in a silver-color foiled bag that's puncture and UV resistant. It absorbs up to seven gallons per each kit.

SPC107697	Dri-Zorb All-Natural Corncob, 40 lb bag	Call for Pricing

Spill Containment

Eagle's spill containment pallets are offered in two sizes; a two drum size (dims: 51" x 26-1/4" x 13-3/4") and a four drum size (dims: 52-1/2" x 51" x 13-3/4"). Both are constructed of polyethylene for excellent chemical resistance. They can be moved easily by a forklift and have a secondary spill capacity of at least 66 gallons. Features include a 3/4" drain plug and grating with 1-1/4" square openings that removes for cleaning. Pallets meet EPA requirements for secondary spill containment of hazardous materials.
