

## Σ/Z Purge®

### High-performance Concentrated Purging Chemical

Now available in 3 levels for more aggressive cleaning capabilities:

**Standard Duty** A quick, economical method to clean injection and blow molding machines and film and sheet extruders which are of a clean, smooth design with minimal changes of resin and routine, frequent cleaning. Works well with PE and PP.

**Heavy Duty** Use where mold designs are more complicated, product runs are longer, color and resin changes more frequent. Works well with PP, PE, Nylon and Polyester. Mix with scrap or cast acrylic for a more aggressive purge.

**Super Duty** Use where mold designs are more complicated, product runs are shorter, color and resin changes more frequent. Works well with more rigid materials, PVC, Nylon and Polycarbonate and especially with molds prone to produce burnt polymer. Mix with scrap or cast acrylic for a more aggressive purge.

#### GENERAL INFORMATION:

**E/Z Purge®** is an ammonia-free, water-based product that removes and cleans unwanted color, material or burned polymer from extruders, injection or blow molding equipment. Purging is a critical part of routine maintenance but costly in terms of system down time, wasted materials and labor costs. The efficient cleaning and purging action of **E/Z Purge®** enables you to make quick, complete changeovers from one color to another, and from one resin type to another. Down time is reduced because there is no need to strip down and manually clean deposits from melt passages. **E/Z Purge®** easily mixes with your own scrap resin to produce unsurpassed purging performance, eliminating the need to purchase more costly resin pellets for purging.

#### FEATURES:

- Eliminates Pulling and Cleaning of Screws
- No Odors — Ammonia-free
- Meets All Safety Requirements — No Hazardous Chemicals
- Will Not Damage Screws or Other Parts
- Contains No Non-melting Particles That Can Block Narrow Passages
- Non-toxic, Non-flammable, Non-abrasive
- Quick & Cost Saving

#### APPLICATIONS:

- Injection Molding
- Blow Molding
- Extrusion
- Co-extrusion

#### MATERIALS:

Polyester, Nylon, PVDC, OPP/EVA, LDPE, HDPE, PS, ABS, PVC, PP, PE

1 qt. mixes with over 100 lbs. of resin

DESCRIPTION	PART NO.	SIZE	PRICE/QUART			BULK PRICE
			1-5	6-11	12+
