

American-Made Steel *American Craftsmanship*

If you're buying all of your screw tip assemblies from the O.E.M., you're paying too much! Services For Plastics, Inc. screw tip assemblies are made from significantly higher quality tool steels than available through the O.E.M. Along with better quality, SFP provides customized designing of the screw tip assembly to successfully work with your brand of molding machine and type of application. And SFP offers them at significantly lower prices than the O.E.M. can offer. SFP screw tip assemblies are the **BEST VALUE** in the industry!

The following list represents a listing of the most popular brands we offer. We have thousands of prints on the major molding machines in North America.

WE CAN MAKE ANY SCREW TIP ASSEMBLY!

We stock a wide variety of brands, plus we also can manufacture any screw tip assembly. Using your sample tip assembly, your print or a print from our extensive library, we will manufacture a screw tip assembly to match your specific requirements. Services For Plastics, Inc screw tip assemblies are available in a wide variety of tool steels to match your application.

AVAILABLE MATERIALS:

H-13 Tool Steel

A good high strength pre-hardened tool steel which is machined, thru-hardened, and ground dimensionally, then nitride hardened for 72 hours for better wear resistance. H-13 is tough and can handle pressure and torque.

D-2 Tool Steel

A high carbon/high chrome tool steel with good wear resistance, but low on torque strength. D-2 should only be used with 4-piece designs where the stud is manufactured from 4140, H-13 or another high torque steel.

CPM®-9V Tool Steel

A new generation tool steel with a high percentage of vanadium carbide developed for high wear (abrasive) applications. It resists wear from abrasive fillers in resin. (Construction: Carbon 1.8%, Manganese 0.50%, Silicon 0.9%, Chromium 5.25%, Molybdenum 1.3%, Vanadium 9.0%.)

CPM®-420V Tool Steel

Crucible's CPM®-420V is a new stainless tool steel best suited for corrosion resistant applications. CPM®-420V is a higher performance upgrade from CPM®-440V. Corrosion resistance is significantly better than CPM®-440V. Wear resistance is about 25-50% better than CPM®-440V, due to the higher vanadium carbide content of CPM®-420V (9% vanadium vs. 5.5-6% in CPM®-440V).

CPM®-M4 Tool Steel

Crucible's CPM®-M4 is a high vanadium, special purpose, high speed steel exhibiting better wear resistance and toughness than D-2 or CPM®-9V. CPM®-M4 has a hardness rating of 64.0. (Construction: Carbon 1.42%, Chromium 4.0%, Vanadium 4.0%, Tungsten 5.5%, Molybdenum 5.25%.)

NOTE: The CPM process produces very homogeneous, high quality steel characterized by superior dimensional stability, grindability and toughness, compared to steels produced by conventional processes.

3 DESIGNS AVAILABLE

Because No One Design is Perfect for Every Application

ACCU-FLO™ Design

Advantages:

- Excellent Design for Most Plastics
- Good for Color Mixing
- Good Shut-off
- Faster Screw Recovery - Less Heat Build-up
- Possibility of Faster Cycles
- 3-Piece Design

Improved Designs With Non-Rotating Rings For These Popular Brands:

- | | |
|-----------------------------|------------|
| - Cincinnati ACT / Roboshot | - Nissei |
| - Goldstar | - Nissin |
| - JSW | - Sumitomo |
| - Kawaguchi | - Toshiba |
| - Mitsubishi | - Toyo |

OEM Design

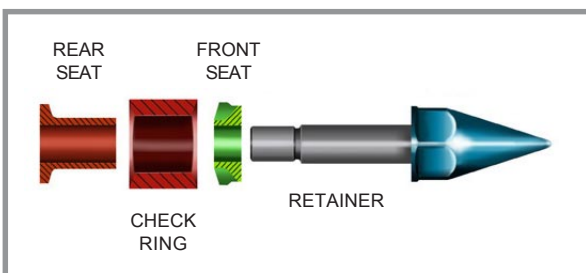

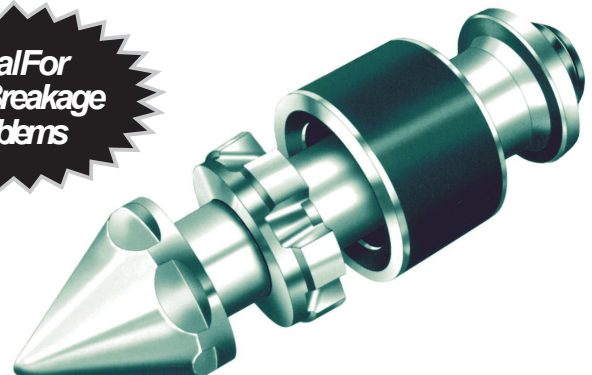

Advantages:

- Good Design for Most General Purpose Materials
- Excellent Shut-off
- Excellent for Small Precise Shots
- OEM Compatible
- Rotating Ring Design Where Applicable
- All the Best Characteristics of OEM plus custom-designed enhancements to improve overall performance
- 3-Piece Design

4-Piece Design

Advantages:

- Ideal for high abrasion materials
- Alloy Tool Steel Nitrided
- Carbide Faced
- Ceramic Faced
- 4-Piece Design

INSTALLATION DIAGRAM FOR ALL DOUBLE ANGLE DESIGN CHECK RINGS

NOTE: ON DOUBLE ANGLE CHECK RINGS, THE LARGER CHECK RING I.D. MUST FACE THE TIP.

HELPFUL HINTS:

- Always use an anti-seize compound on all threaded areas during assembly.
- Do not over-torque! Check your instruction manual for torque recommendations.
- *Never attempt to rotate or retract a feedscrew without resin.* Always use a heat stable, low temperature plastic resin, that does not contain fillers or corrosive additives whenever you shut down the machine.

*We are always looking for helpful information to make your job easier.
If you have any suggestions, let us know.*
