

Mold Chutes

Reduce Scrap and Eliminate Contamination

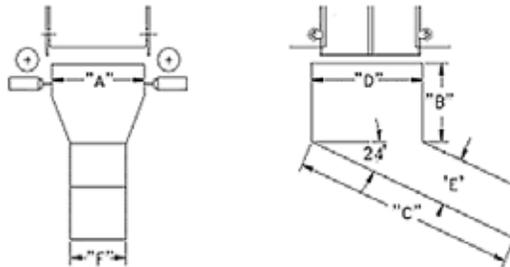

Mold Chutes are an ideal solution to prevent your parts from scattering randomly in the “drop zone.” Mold Chutes ensure your parts land on the conveyor or in the packing case -- **not on the floor.**

Mold Chutes are made of durable plastic with a PVC lining in the bottom to protect even delicate molded parts. They are uniquely constructed so they will not absorb oil or grease, while being abrasion, puncture and tear resistant. They are easy to clean and have no folds to trap moldings or dirt. Mold Chutes are available in a wide variety of styles and sizes, and can easily be attached to your machine using magnets.

The unique design of right angle mold chutes allow for attachment to each mold half. As the mold opens and closes, the mouth of the chute opens and closes to provide better protection from contaminants. In line mold chutes attach to the press and are static.

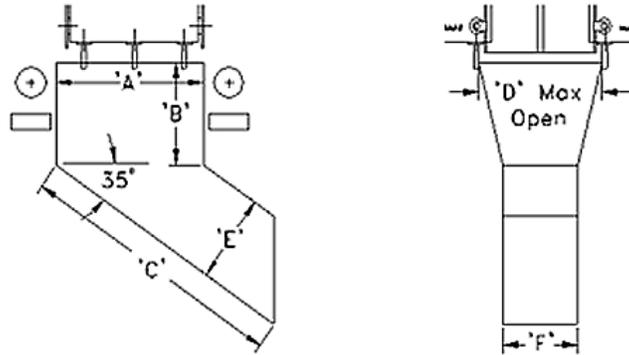

In-Line Mold Chutes

IMC (In Line Chute)

Custom Quote/Order Form

Please fill in A, B, C, D, E & F

Instructions

- A - Widest point of "Tool Open" of full platen open
- B - Drop to clear obstruction and chassis to exit point of chute
- C - Distance from rear to chute exit
- D - Distance across machine chassis (or your own fixing point)
- E - Height of chute exit
- F - Width of chute exit

Please Select inch cm

Installation

1. Chute CANNOT MOVE with the mold
2. Chute is mounted with supplied magnets and velcro
3. Chute can be hung from machine chassis (or your own fixing point)

RMC (Right Angle Chute)

Custom Quote/Order Form

Please fill in A, B, C, D, E & F

Instructions

- A - Distance across machine chassis or widest point of plattens
- B - Drop to clear obstructions and chassis to exit point of chute
- C - Length of exit chute required (including chassis bed width)
- D - Widest point of "Tool Open" of full platen open
- E - Height of chute exit
- F - Width of chute exit

Please Select inch cm

Installation

1. Chute CANNOT MOVE with the mold
2. Chute is mounted with supplied magnets and velcro
3. Chute can be hung from plattens
4. Chute can be hung from machine chassis (or your own fixing point)
