SPECIFICATIONS

MACHINE MAKE: ____________________________ MODEL NO.: ______________________
SIZE: ___________________________ (millimeters/inches) OUNCE CAPACITY: __________ (ounces)
MOLDING PROCESS: ❑ Injection ❑ Extrusion ❑ Blow Molding ❑ Thermoset
TYPE: ❑ Vented ❑ Bell End ❑ Straight End

MEASURING INSTRUCTIONS:
- Measure from face of flange to first thermocouple.
- Measure from first thermocouple to second thermocouple.
- Follow suit through front of barrel measuring between thermocouples.
- Measure circumference with tape measure. Always measure O.D. of heater band. If there is a junction box, measure over it.
- Record dimensions on diagram below.

HINTS:
- The rear of the machine is where the hopper is.
- Always measure machines from operator side.
- The front blanket will end at the large diameter of the barrel, right behind the nozzle adapter.
- The measuring tape should fit snug, no slack.

If your barrel has more than 3 thermocouples, continue measuring in the same manner as above and record dimensions below.
